A business strategy and operational planning document covering:

- **Executive Summary**
 - Core objectives and value proposition
- **Industry Problem**
 - Fragmented logistics coordination in emerging markets
- **Core User Personas**
 - 4 personas with roles, workflows, and KPIs
- **Operational Workflow**
 - 7-step digital workflow from fleet registration to delivery confirmation
- **Hidden Pain Points**
 - 8 systemic problems (double booking, fuel waste, human dependency, etc.)
- **Before/After Scenario**
 - Cebu-to-Ormoc dispatch case study (30 min → 5 min)
- **System Modules**
 - 10 integrated modules with detailed descriptions
- **Future AI Features**

- 7 ML capabilities (delay prediction, smart matching, fuel optimization)

- Competitive Landscape

- Positioning against indirect, partial, and enterprise competitors

- Revenue Model

- 7 monetization streams with Year 1-3 ARR projections

- Tech Stack

- Frontend, backend, database, real-time, maps, and DevOps recommendations

- Long-Term Vision

- 4-phase roadmap to marketplace for shared truck capacity

- Operational KPIs

- 10 metrics with targets and priorities

- Strategic Insight

- Network effects and competitive moat analysis
