

Software Architecture Diagrams Guide

A practical guide to the most relevant architecture diagrams for designing a logistics coordination platform and other enterprise software.

System Context Diagram (C4 Level 1)

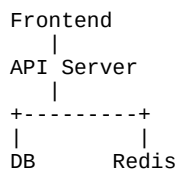

Shows the system and external actors.

Use: Stakeholders, investors, requirements

Container Diagram (C4 Level 2)

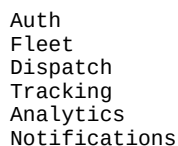

Shows major systems.

Use: Infrastructure planning

Component Diagram

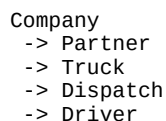

Shows internal modules.

Use: Code organization

Database ERD

Shows database relationships.

Use: Database design

User Flow Diagram

Shows user navigation.

- > Dashboard
- > Truck List
- > Assign Dispatch
- > Delivery Tracking

Use: UX planning

Business Process Flow Diagram

Shows operational workflow.

- Need Truck
- > Check Availability
 - > Assign Truck
 - > Load Cargo
 - > Deliver Cargo
 - > Proof of Delivery

Use: Workflow optimization

Sequence Diagram

Shows interactions over time.

- Dispatcher
- > API
 - > Database
 - > Notification Service
 - > Driver

Use: API and realtime design

Deployment Diagram

Shows deployment infrastructure.

- Internet
- > Cloudflare
 - > NGINX
 - > Docker
 - > API + Database

Use: DevOps planning

Network Architecture Diagram

Shows network communications.

- Driver Phone
- > WebSocket Gateway
 - > API
 - > Database

Use: Realtime systems

Data Flow Diagram

Shows movement of information.

- GPS Data
- > Tracking Service
 - > Database
 - > Dashboard

Use: Analytics and reporting

Event Architecture Diagram

Shows event-driven systems.

Truck Updated
-> Event Bus
-> Analytics
-> Notifications

Use: Scalability

Security Architecture Diagram

Shows security layers.

User
-> JWT Auth
-> API Gateway
-> Business Logic
-> Database

Use: Enterprise security

Recommended Diagram Order

1. Business Process Flow Diagram
2. System Context Diagram
3. User Flow Diagram
4. Database ERD
5. Container Diagram

Then:

6. Component Diagram
7. Sequence Diagram
8. Deployment Diagram

When scaling:

9. Data Flow Diagram
10. Event Architecture Diagram
11. Network Architecture Diagram
12. Security Architecture Diagram
